SUMMARY

Full-stack developer focused on backend systems and building scalable web applications using Flask and React. Strong in API design, performance optimization, and real-world project development.

SKILLS

Programming: Python, JavaScript, Dart

Frontend: React.js, Flutter, HTML, CSS, Bootstrap

Backend: Flask, REST APIs, Authentication

Databases: PostgreSQL, Firebase Firestore, Redis

Cloud: Firebase, Vercel, Render

Tools: Git, GitHub, VS Code

EDUCATION

CMR Engineering College

B.Tech in Computer Science

2021 – 2025

Hyderabad, Telangana

PROJECTS

Savlink: Scalable Link Management SaaS Platform | *React, Flask, PostgreSQL, Redis, Firebase*

🌐 Live | 🐙 GitHub

- Designed a scalable link management system with structured organization (folders, tags) and efficient retrieval using optimized queries
- Developed secure Flask APIs with authentication and strict user ownership validation
- Optimized performance using Redis caching and efficient database queries for faster response times

CineBrain: AI-Powered Entertainment Platform | *Python, Flask, ML, PostgreSQL, Redis*

🌐 Live | 🐙 GitHub

- Built a recommendation system using TF-IDF and cosine similarity for personalized content suggestions
- Developed Flask backend with PostgreSQL and Redis caching to reduce response time and improve data retrieval efficiency
- Integrated multiple external APIs to fetch real-time movie and anime data

Weatherly: Weather Application | *Flutter, Flask, OpenWeather API*

🌐 Live | 🐙 GitHub

- Developed a cross-platform weather application with real-time data handling and location-based forecasting
- Built Flask backend with API integration, caching, and rate limiting
- Designed clean and responsive UI with dynamic theming

DEVELOPER PROFILES

GitHub (Projects and deployments)

LeetCode (Practicing problem solving)

INTERESTS

Building automation tools and bots to improve productivity

Building and experimenting with new web technologies through side projects

Learning system design and improving problem-solving skills
