SUMMARY

Computer Science graduate (B.Tech, 2025) with hands-on experience building and deploying full-stack web and mobile applications. Skilled in Python, FastAPI, Flask, React, Next.js, TypeScript, PostgreSQL, and Redis. Experienced in developing REST APIs, integrating databases and external services, and building responsive web and cross-platform mobile applications through independent projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart, SQL

Backend: FastAPI, Flask, REST APIs, JWT Authentication

Frontend: HTML5, CSS3, React, Next.js, Tailwind CSS, Responsive Design

Mobile: Flutter (cross-platform mobile apps)

Databases & Caching: PostgreSQL, MySQL, Redis

Tools: Git, GitHub, Docker, Vercel, Postman

Methodologies: Agile, Scrum

PROJECTS

Weatherly | *FastAPI, PostgreSQL, Redis, React, Vite, Tailwind CSS, Flutter, Dart* Live | Code

- Built a FastAPI backend that aggregates six weather providers with automatic failover, using PostgreSQL and Redis caching.
- Developed a React web app with forecast, location search, analytics, and alerts pages; managed server state with React Query and client-side state with Zustand, and deployed on Vercel.
- Built a Flutter Android app on the same API that shows the last known weather offline, and published downloadable APK releases.

CineBrain | *Flask, PostgreSQL, Redis, React, Vite, JavaScript* Live | Code

- Built a platform to discover movies, TV shows, and anime with personalized recommendations, using a React (Vite) front end and a Flask API.
- Implemented content discovery, reviews, and secure login on a PostgreSQL database.
- Added Redis caching to avoid repeated lookups; integrated the TMDB API and Cloudinary for media data and delivery.

ToolVerse | *Next.js, TypeScript, CSS* Live | Code

- Built a privacy-first utility platform with the Next.js App Router and TypeScript; tools such as a JSON formatter, Base64 and URL encoders, UUID and password generators, and a JWT decoder run entirely in the browser.
- Designed a responsive, dark-first interface with category pages, tool search, and a mobile bottom-sheet widget; persisted recents, pins, and tasks in localStorage.

Savlink | *Flask, PostgreSQL, Redis, React, Tailwind CSS* Live | Code

- Built a bookmark manager to save, organize, and search links using folders and tags, with a responsive React and Tailwind CSS interface.
- Developed Flask REST APIs with PostgreSQL for authentication and data management, and Redis for caching.

EDUCATION

CMR Engineering College 2021 – 2025
B.Tech in Computer Science & Engineering *Hyderabad, Telangana*
